3rd Breast cancer forum: Breast cancer in the young, the pregnant and with family history

Date: Friday 16 September 2016
Venue: Royal Society of Medicine, 1 Wimpole Street, London, W1G 0AE
CPD: 6 credits
Breast cancer in the young, the pregnant and with family history
Friday 16 September 2016

Aim
To review the treatment and multidisciplinary approach for the management of breast cancer in the following groups of patients: younger pre-menopausal women; pregnant women; women with a family history of breast cancer.

Objectives
At the end of this conference, delegates will:
• Understand the importance of adopting a holistic approach to care
• Understand the various perspectives and contributions of the specialists involved in care
• Know about the range of possible complications of the disease and it’s treatment in pregnant women
• Know about the approach to fertility preservation
• Understand the epidemiology of breast cancer; how to identify risk and the place of preventative measures
• Understand the importance and impact of good, effective, communication with patients and patient advocacy support networks
